[Github](#)

New York, NY

**SKILLS** JavaScript, Ruby, Python, React, Redux, HTML, CSS, SCSS, Ruby on Rails, Mongoose, MongoDB, Node.js, Express.js, SQL, SQLite3, PostgreSQL, Webpack, jQuery, Git, Heroku, Adobe Photoshop, Amazon Web Services (AWS)

## PROJECTS

**FauxFlix** | *(React, Redux, Rails, Ruby, AWS, JavaScript, HTML5, CSS3)* | **Netflix Clone**

[live](#) | [github](#)

- Leveraged polymorphic associations in SQL database between videos hosted on AWS and the many genres in the rails backend to create DRY many-to-many relationships so the user can easily view videos by genre
- Secured site with BCrypt and React Router, limiting access of certain pages to registered users
- Integrated CRUD functionality with Redux state management allowing users to manage their video list
- Utilized React state to update volume icons, display accordion content, expand search bar, and play videos in response to user behavior, leading to a more polished, responsive user interface

**Pomegranate** | *(MongoDB, Express, React, Node, Spoonacular API)* | **Recipe Generator App**

[live](#) | [github](#)

- Employed custom HTTP API requests to Spoonacular, passing resulting payloads to React components as needed
- Implemented dynamic CSS prototyped in Photoshop to create clean, engaging, thoughtful design, improving user experience and unifying brand messaging
- Designed and engineered custom 404 landing page via React-Router to ensure consistent user experience (UX) and provide appropriate user feedback even when navigating to unexpected frontend routes

## EXPERIENCE

**Software Engineer, Community Contributor**

Dec 2021 - Present

*Preset, New York, NY*

- Volunteer collaboratively by developing data visualization tool (Superset) in JavaScript, React, and TypeScript
- Work with relational and NoSQL databases and develop APIs using popular Python frameworks
